

ABOUT MEETING KITCHEN

Our activities

Meeting Kitchen develops solutions and online tools to structure joint decision-making processes. We thereby increase your ability to work successfully with others.

What characterizes us

We are convinced of two principles:

- ➔ Good strategies are principled strategies (i.e.: they address both substance and relationship)
- ➔ Results are generally only as good as the method by which they were achieved.

Our products

➔ **ADDED INSIGHT**

This tool enables you to evaluate and develop your cooperation and negotiation abilities (through self-learning or embedded in a training course).

➔ **MEETING AHEAD / NEGOTIATION TOOLBOX**

The quality and efficiency of negotiations increases by following a structured process of introduction, preparation, conduct, and debriefing. That is why we have developed appropriate tools for you.

➔ **P2D (FROM PATIENT TO DOCTOR) The medical dialogue assistant**

There are certain situations where joint decision-making is particularly demanding, such as patient-doctor consultations. We have developed a tool for such consultations, which is currently being tested in university hospitals.

Contact

Please get in touch if you face some complex joint decision-making situations. We look forward to developing together with you solutions and tools that will allow you to master such situations successfully.
